

SUPERIOR PLUS PAINTING & REMODELING

Comprehensive Yoast SEO & Google Growth Plan

A page-by-page, client-aligned implementation plan for discoverability, local relevance, technical quality, content authority and measurable organic growth—without replacing the client-approved website wording.

Website

sppaintingremodeling.com.au

Content authority

Live WordPress copy + client PDFs

Prepared

11 August 2026

Scope

Every URL in all 8 live Yoast sitemaps

The strategy in one page

The site already contains substantial client-approved service information. The priority is to make that information technically unambiguous, easy to crawl, locally credible and connected by a deliberate internal-link structure. Yoast is the control panel; it is not a ranking switch.

No responsible SEO plan can guarantee first place, a specific date, or a Google rich result. This plan improves eligibility, clarity and competitiveness. Rankings remain dependent on competition, location, authority, reviews, links, search demand and Google's systems.

Layer 1 — Repair

Consolidate duplicate URLs, correct the Service Areas directory, remove thin records from the sitemap, fix schema ownership and confirm every canonical.

Layer 2 — Organise

Give every page one search intent, one primary keyphrase, useful supporting terms and links to its parent, related services and relevant local pages.

Layer 3 — Prove

Add real project evidence, team expertise, verified business details, original images, reviews and local references—not generic suburb-name swapping.

Layer 4 — Publish

Strengthen the 19 approved guides, add author/reviewer and update dates, connect each guide to one service cornerstone, and release consistently.

Layer 5 — Promote

Improve Google Business Profile, consistent business citations, partnerships, project mentions and legitimate local links.

Layer 6 — Measure

Track non-brand clicks, qualified enquiries, calls, quote submissions, indexed pages and local visibility—not only Yoast traffic-light colours.

First five actions

1. Back up and stage the site; record current traffic, enquiries, indexed pages and rankings.
2. Choose one canonical URL for every duplicate route family and implement one-hop 301 redirects.
3. Make one system responsible for title, description, canonical and schema output; verify raw HTML and rendered HTML.
4. Fix the generic `/service-areas/` directory so it is not serving Chadstone-specific metadata/content.
5. Optimise the core and service pages first; release suburb pages in evidence-backed tiers rather than indexing all 67 at once.

What may change—and what must stay intact

Authority order

Priority	Source	How this plan uses it
1	Current client-approved live WordPress wording	Preserve headings, claims, descriptions and client tone unless the client explicitly approves a rewrite.
2	Client-supplied master and individual page PDFs	Use to check coverage, terminology, service scope, FAQs, process, testimonials, areas and article intent.
3	Approved content bundled with the theme/plugin	Use as a recovery/reference layer where a live field is unintentionally empty—not to overwrite intentional edits.
4	SEO additions	Add titles, descriptions, canonicals, links, alt text and supporting sections without silently changing service promises.

Client-preference rule: SEO work describes the approved service accurately. It must not invent licences, warranties, team size, years in business, price claims, response times, products, addresses or suburbs actually serviced.

Documents reconciled

Master website pages; service areas keyword map; About; Additional Services; Residential, Commercial, Interior, Exterior, Roof, Fence, Deck, Wallpaper Removal and Plaster Repairs pages; Our Painting Process; FAQs; Testimonials and Reviews; Get in Touch; and the website blogs document.

How to handle the older page-to-suburb keyword sheet

The sheet maps terms such as “Painters Mount Waverley” to About and “Interior Painters Glen Waverley” to Interior. Forcing suburb phrases into unrelated Melbourne-wide pages would blur intent and compete with the dedicated suburb pages. This plan keeps:

- **Service pages** focused on the service across Melbourne.
- **Suburb pages** focused on painters in that suburb, with locally relevant services.
- **About, Process and Contact** focused on trust, method and conversion—not used as substitute doorway pages.
- **The client’s requested suburb/service pairings** as supporting anchors and local content priorities where factually appropriate.

Technical priorities before page polishing

Finding	Risk	Required action
Duplicate route families exist for services, service areas, additional services and articles.	Split signals, duplicate indexing, unstable canonicals and wasted crawl attention.	Select one permanent URL, 301 every alternate directly to it, use only the canonical URL in links and sitemaps.
The live /service-areas/ directory has returned Chadstone-specific hero data.	The directory and Chadstone page compete; title/H1 do not match directory intent.	Restore generic Melbourne eastern-suburbs directory fields and retest API, raw HTML, browser title and canonical.
Yoast and the custom theme/plugin can both emit title, description, canonical and schema.	Duplicate or conflicting tags; breadcrumb errors; Google chooses an unintended signal.	Assign one owner per property. Prefer server-rendered Yoast output only if the custom system consumes it consistently; otherwise disable the duplicate Yoast/custom output.
Custom post-type sitemaps include services, projects, articles, testimonials and FAQs.	Internal records or thin pages can enter Google.	Index only content with a useful standalone public page. Noindex internal-only records and confirm they disappear from Yoast sitemaps.
Articles appear under both /painting-guides/ and /blog/ families.	Two URLs can represent the same article.	Keep the URL family used by the live navigation—recommended /blog/{slug}/—and 301 each old guide URL to its exact article.
Camberwell and Hawthorn East cards have had missing image sources; mobile floating controls can overlap copy.	Weaker user experience, image-search loss and lower conversion.	Add valid media-library images and alt text; test overlays at 320, 360, 390 and 430 px widths.

Duplicate URL consolidation map

Keep as canonical	Redirect the alternate
/services/	/painting-services-melbourne/
/service-areas/	/professional-painters-in-melbourne-eastern-suburbs/
/services/roof-painting-melbourne/	/roof-painting-melbourne/
/services/commercial-painting-melbourne/	/commercial-painting-melbourne/
/services/residential-painting-melbourne/	/residential-painting-melbourne-house-painters-melbourne/
/service-areas/camberwell/	/service-areas/painters-camberwell-house-painters-camberwell/
/service-areas/hawthorn-east/	/service-areas/painters-hawthorn-east-house-painters-hawthorn-east/
/additional-services/	/property-improvement-services-melbourne/
/blog/ and /blog/{slug}/	/painting-guides-melbourne/, /painting-guides/ and matched article duplicates

Confirm each pair against WordPress IDs and analytics before deployment. Never redirect unrelated missing URLs to the homepage; use the closest equivalent or a genuine 404/410.

One safe global setup

Yoast area	Recommended setting	Reason
Site representation	Organisation; exact trading name, real logo and verified social profiles.	Connects consistent entity information. Do not enter an unverified address.
Site basics	Website name: Superior Plus Painting & Remodeling. Keep a short alternate name only if actually used.	Consistency across metadata and schema.
Pages	Show in search results: Yes. Default schema: WebPage.	Core landing pages should be discoverable.
Blog/articles	Show in search: Yes when complete. Page type WebPage; Article type BlogPosting.	Preserves article dates, author and publisher relationships.
Service CPT	Index only if its public URL is the canonical service page. Otherwise noindex the duplicate record.	Avoids two records for one service.
Project CPT	Index only substantial case studies with unique scope, suburb, service, images and outcome.	Thin gallery records should not consume the sitemap.
Testimonial/FAQ CPT	Noindex when records are only embedded inside other pages.	Prevents thin standalone records.
Author archives	Noindex if there is one author or no useful biography archive.	Avoids a duplicate/thin archive.
Date archives	Disable/noindex unless users genuinely browse by date.	Local service content is not date-archive driven.
Category archives	Index only curated categories with an introduction and enough distinct articles; otherwise noindex.	A bare list is weak search content.
Media pages	Redirect attachment URLs to the media item or parent page.	Prevents thin attachment pages.
XML sitemap	Enabled; submit only /sitemap_index.xml.	Yoast automatically excludes noindexed records.

Metadata ownership gate: View the raw page source. There must be one canonical, one useful meta description and one coherent schema graph. If both Yoast and the Superior Plus system output competing versions, resolve the integration before editing dozens of fields.

Recommended page-specific schema types

About: AboutPage Contact: ContactPage Services/Areas/Blog directories: CollectionPage Services/Suburbs: WebPage
 Articles: WebPage + BlogPosting FAQ: FAQPage only when visible Q&A matches markup

A local painting business should not expect FAQ rich results, and self-published testimonials should not be marked up to obtain self-serving LocalBusiness review stars. Schema must match visible content and must not duplicate another provider's graph.

How to optimise one page safely

- 1 **Confirm the page intent.** One page should answer one main need: service, location, company information, process, contact or educational question.
- 2 **Preserve approved copy.** Compare the live page with the client PDF. SEO edits may add missing context and links but must not silently change promises or wording.
- 3 **Enter the focus keyphrase.** Use it as an editing prompt, not as a ranking guarantee. A red/orange Yoast light is not permission to repeat awkward phrases.
- 4 **Set the SEO title and meta description.** Keep them distinct, accurate and compelling. Google may still rewrite either.
- 5 **Set the canonical only when needed.** A normal unique page should self-canonicalise. A duplicate should normally be redirected, not merely canonicalised.
- 6 **Select schema type.** Choose the page's actual function. Do not select FAQPage unless the full Q&A is visible.
- 7 **Add internal links.** Link upward to a hub, sideways to relevant services/areas, and downward to supporting guides. Use descriptive anchor text.
- 8 **Preview desktop and mobile.** Check title wrapping, hero height, long lists, images, floating buttons, forms and accordion accessibility.
- 9 **Publish, purge cache, test.** Verify status 200, canonical, indexability, sitemap membership, schema validation and the actual live text.
- 10 **Record the change.** Log URL, date, title, meta, focus phrase, links added and baseline Search Console figures.

Yoast quality rule

Aim for useful, natural copy and correct technical output. Do not weaken client-approved language, overstuff suburbs, add filler, or make every indicator green at the expense of readers.

Core pages: exact Yoast direction

Canonical page	Focus keyphrase	Recommended SEO title	Recommended meta description	Schema / links
/	painters Melbourne	Professional Painters Melbourne Superior Plus Painting	Superior Plus Painting provides residential and commercial painting across Melbourne with careful preparation, premium finishes and free written quotes.	WebPage; link to Services, Areas, Gallery, About, Process and Contact
/services/	painting services Melbourne	Painting Services Melbourne Residential & Commercial	Explore residential, commercial, interior, exterior, roof, fence, deck, wallpaper removal and plaster repair services across Melbourne.	CollectionPage; link to every service and Additional Services
/service-areas/	painters Melbourne eastern suburbs	Painters Melbourne Eastern Suburbs Service Areas	View the Melbourne suburbs serviced by Superior Plus Painting for residential, commercial, interior, exterior and property painting projects.	CollectionPage; must use generic directory content, not Chadstone copy
/additional-services/	property improvement services Melbourne	Property Improvement Services Melbourne Superior Plus	Explore coordinated property improvement services in Melbourne, including preparation, repairs and finishing support alongside professional painting.	WebPage; link to relevant services and Contact
/about/	about Superior Plus Painting	About Superior Plus Melbourne Painting Team	Learn about Superior Plus Painting, our preparation-first approach, communication, workmanship and commitment to Melbourne homes and businesses.	AboutPage; link to Process, Gallery, Reviews and Contact
/our-process/	professional painting process	Our Painting Process Superior Plus Melbourne	See how Superior Plus Painting plans, prepares, paints, inspects and cleans each Melbourne residential and commercial painting project.	WebPage; link to Services, FAQ and Contact
/gallery/	Melbourne painting projects	Melbourne Painting Projects Superior Plus	View selected residential, commercial, interior, exterior, roof, fence and deck painting projects completed by Superior Plus Painting.	CollectionPage; each image/project links to its relevant service
/faqs/	painting FAQs Melbourne	Painting FAQs Melbourne Superior Plus Painting	Find clear answers about quotes, preparation, paint systems, project timing, access, clean-up and professional painting across Melbourne.	FAQPage only for visible matched Q&A; link answers to services
/blog/	painting advice Melbourne	Painting Advice Melbourne Superior Plus	Read practical Melbourne painting guides about preparation, interiors, exteriors, roofs, maintenance, colours and choosing a professional painter.	CollectionPage; link to all canonical guides
/contact/	painting quote Melbourne	Free Painting Quote Melbourne Superior Plus	Request a free, no-obligation painting quote in Melbourne. Tell Superior Plus Painting about your property, surfaces, location and preferred timing.	ContactPage; verify phone, email and form delivery

Homepage title/content rule: keep the client-approved hero and body wording. The SEO title is a search label, not a replacement H1. Keep the three assurance points—fully insured, free written quotes and careful preparation—when those claims remain accurate.

Service pages: exact Yoast direction

Canonical page	Focus keyphrase	Recommended SEO title	Recommended meta description	Primary links
/services/residential-painting-melbourne/	residential painting Melbourne	Residential Painting Melbourne Superior Plus Painting	Professional residential painting across Melbourne for complete home repaints, interior refreshes and exterior transformations. Request a free quote.	Interior, Exterior, Roof, Plaster, priority suburbs, Gallery, Contact
/services/commercial-painting-melbourne/	commercial painters Melbourne	Commercial Painters Melbourne Superior Plus Painting	Commercial painting for Melbourne offices, shops, warehouses, managed properties and workplaces, planned to reduce disruption. Request a quote.	Interior, Exterior, Plaster, Dandenong, Mulgrave, Gallery, Contact
/services/interior-painting-melbourne/	interior painting Melbourne	Interior Painting Melbourne Superior Plus Painting	Professional interior painting in Melbourne for walls, ceilings, trims and living spaces, with careful protection and surface preparation.	Residential, Plaster, Wallpaper, Glen Waverley, guides, Contact
/services/exterior-painting-melbourne/	exterior painting Melbourne	Exterior House Painting Melbourne Superior Plus	Protect and refresh your Melbourne property with professional exterior painting, detailed preparation and durable coating systems. Free quote.	Residential, Roof, Fence, Deck, Clayton, guides, Contact
/services/roof-painting-melbourne/	roof painting Melbourne	Roof Painting Melbourne Superior Plus Painting	Professional roof painting in Melbourne with assessment, cleaning, preparation, suitable coatings and a carefully finished result. Request a quote.	Exterior, Residential, Noble Park, roof guide, Gallery, Contact
/services/fence-painting-melbourne/	fence painting Melbourne	Fence Painting Melbourne Superior Plus Painting	Refresh and protect Melbourne fences with professional preparation and suitable brush, spray, paint or stain finishes. Request a free quote.	Exterior, Deck, Springvale, fence guide, Gallery, Contact
/services/deck-painting-staining-melbourne/	deck painting Melbourne	Deck Painting & Staining Melbourne Superior Plus	Restore and protect outdoor timber with professional deck painting and staining in Melbourne. Careful preparation and suitable finishes.	Exterior, Fence, Residential, projects, maintenance guide, Contact
/services/wallpaper-removal-melbourne/	wallpaper removal Melbourne	Wallpaper Removal Melbourne Superior Plus	Professional wallpaper removal in Melbourne, including careful stripping, adhesive cleaning, wall preparation and paint-ready finishing.	Interior, Plaster, Residential, preparation guide, Contact
/services/plaster-repairs-melbourne/	plaster repairs Melbourne	Plaster Repairs Melbourne Superior Plus Painting	Professional plaster repairs in Melbourne for cracks, holes and damaged walls or ceilings, prepared for a smooth painting finish.	Interior, Residential, Burwood, crack-repair guide, Contact

Additional-services expansion backlog

The client keyword PDF also identifies kitchen cabinet painting, epoxy garage floors, pressure washing, weatherboard painting, and strata/body corporate painting. Keep these as sections on /additional-services/ until each has verified capability, original images, a complete scope, process, FAQs and project evidence. Create a standalone page only when it can genuinely answer a distinct service intent.

How to handle 67 suburb pages safely

Every suburb page must be more than the same paragraph with a different place name. Google's spam policies specifically warn against doorway pages and scaled content created mainly to manipulate rankings. The safe approach is staged indexing based on real local usefulness.

Tier	Indexing rule	Minimum evidence before indexing
Tier 1 Primary client markets	Optimise first and keep indexable once complete.	Unique local introduction, property context, suitable services, 2–4 original project images where available, nearby-area links, one testimonial/project reference if genuine, and an accurate CTA.
Tier 2 Adjacent growth markets	Index in batches after Tier 1 is stable.	All Tier 1 quality checks except a local project may be replaced temporarily by detailed suburb-specific property/surface guidance. Add proof before promotion.
Tier 3 Coverage inventory	Keep accessible for users but noindex until genuinely differentiated.	Do not index a templated page merely because it exists. Promote only after unique evidence and editorial review.

Per-suburb Yoast pattern

- **Focus keyword:** painters {Suburb}; secondary phrase: house painters {Suburb}.
- **Title pattern:** Painters {Suburb} | House & Commercial Painting. Vary naturally where a verified specialty is stronger.
- **Meta pattern:** Professional painting in {Suburb} for homes and commercial properties. Careful preparation, clear quotes and durable finishes. Request a free quote.
- **H1:** Professional Painters in {Suburb}. Keep one H1; use H2s for services, local property needs, process, proof, nearby areas and quote CTA.
- **Links:** Service Areas hub, 2–4 relevant services, 3–5 genuine neighbouring suburbs, Contact, and one applicable guide.
- **Schema:** WebPage + BreadcrumbList through the single approved schema provider. Do not create a fake LocalBusiness branch/address in every suburb.

Avoid: hidden city lists, blocks of repeated suburbs, fake local offices, copied testimonials, invented project claims, or 67 pages published simultaneously with near-identical copy.

Suburb implementation register

Use the priority column to decide the publishing order. “Client target” reflects the supplied keyword map or locations repeatedly emphasised in approved content; it does not replace page-level evidence requirements.

Suburb / canonical route	Region	Priority	Focus keyphrase	Required action
Chadstone /service-areas/chadstone/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Chadstone	Complete unique proof and index first
Mount Waverley /service-areas/mount-waverley/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Mount Waverley	Complete unique proof and index first
Glen Waverley /service-areas/glen-waverley/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Glen Waverley	Complete unique proof and index first
Oakleigh /service-areas/oakleigh/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Oakleigh	Complete unique proof and index first
Mulgrave /service-areas/mulgrave/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Mulgrave	Complete unique proof and index first
Clayton /service-areas/clayton/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Clayton	Complete unique proof and index first
Burwood /service-areas/burwood/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Burwood	Complete unique proof and index first
Ashwood /service-areas/ashwood/	Monash & nearby eastern suburbs	Client target / Tier 1	painters Ashwood	Complete unique proof and index first
Dandenong /service-areas/dandenong/	Greater Dandenong	Client target / Tier 1	painters Dandenong	Complete unique proof and index first
Noble Park /service-areas/noble-park/	Greater Dandenong	Client target / Tier 1	painters Noble Park	Complete unique proof and index first
Springvale /service-areas/springvale/	Greater Dandenong	Client target / Tier 1	painters Springvale	Complete unique proof and index first
Keysborough /service-areas/keysborough/	Greater Dandenong	Client target / Tier 1	painters Keysborough	Complete unique proof and index first
Berwick /service-areas/berwick/	Casey & outer south-east	Client target / Tier 1	painters Berwick	Complete unique proof and index first
Narre Warren /service-areas/narre-warren/	Casey & outer south-east	Client target / Tier 1	painters Narre Warren	Complete unique proof and index first
Endeavour Hills /service-areas/endeavour-hills/	Casey & outer south-east	Client target / Tier 1	painters Endeavour Hills	Complete unique proof and index first
Hawthorn /service-areas/hawthorn/	Inner Eastern Suburbs	Growth / Tier 2	painters Hawthorn	Upgrade, then index in a measured batch

Suburb / canonical route	Region	Priority	Focus keyphrase	Required action
Hawthorn East /service-areas/hawthorn-east/	Inner Eastern Suburbs	Client target / Tier 1	painters Hawthorn East	Complete unique proof and index first
Kew /service-areas/kew/	Inner Eastern Suburbs	Growth / Tier 2	painters Kew	Upgrade, then index in a measured batch
Kew East /service-areas/kew-east/	Inner Eastern Suburbs	Growth / Tier 2	painters Kew East	Upgrade, then index in a measured batch
Camberwell /service-areas/camberwell/	Inner Eastern Suburbs	Client target / Tier 1	painters Camberwell	Complete unique proof and index first
Canterbury /service-areas/canterbury/	Inner Eastern Suburbs	Growth / Tier 2	painters Canterbury	Upgrade, then index in a measured batch
Balwyn /service-areas/balwyn/	Inner Eastern Suburbs	Growth / Tier 2	painters Balwyn	Upgrade, then index in a measured batch
Balwyn North /service-areas/balwyn-north/	Inner Eastern Suburbs	Growth / Tier 2	painters Balwyn North	Upgrade, then index in a measured batch
Surrey Hills /service-areas/surrey-hills/	Inner Eastern Suburbs	Growth / Tier 2	painters Surrey Hills	Upgrade, then index in a measured batch
Mont Albert /service-areas/mont-albert/	Inner Eastern Suburbs	Growth / Tier 2	painters Mont Albert	Upgrade, then index in a measured batch
Deepdene /service-areas/deepdene/	Inner Eastern Suburbs	Hold / Tier 3	painters Deepdene	Noindex until differentiated
Box Hill /service-areas/box-hill/	Inner Eastern Suburbs	Client target / Tier 1	painters Box Hill	Complete unique proof and index first
Box Hill North /service-areas/box-hill-north/	Inner Eastern Suburbs	Growth / Tier 2	painters Box Hill North	Upgrade, then index in a measured batch
Box Hill South /service-areas/box-hill-south/	Inner Eastern Suburbs	Growth / Tier 2	painters Box Hill South	Upgrade, then index in a measured batch
Malvern /service-areas/malvern/	South Eastern Suburbs	Growth / Tier 2	painters Malvern	Upgrade, then index in a measured batch
Malvern East /service-areas/malvern-east/	South Eastern Suburbs	Growth / Tier 2	painters Malvern East	Upgrade, then index in a measured batch
Glen Iris /service-areas/glen-iris/	South Eastern Suburbs	Growth / Tier 2	painters Glen Iris	Upgrade, then index in a measured batch
Burwood East /service-areas/burwood-east/	South Eastern Suburbs	Growth / Tier 2	painters Burwood East	Upgrade, then index in a measured batch
Wheelers Hill /service-areas/wheelers-hill/	South Eastern Suburbs	Growth / Tier 2	painters Wheelers Hill	Upgrade, then index in a measured batch
Hughesdale /service-areas/hughesdale/	South Eastern Suburbs	Growth / Tier 2	painters Hughesdale	Upgrade, then index in a measured batch

Suburb / canonical route	Region	Priority	Focus keyphrase	Required action
Oakleigh East /service-areas/oakleigh-east/	South Eastern Suburbs	Growth / Tier 2	painters Oakleigh East	Upgrade, then index in a measured batch
Oakleigh South /service-areas/oakleigh-south/	South Eastern Suburbs	Growth / Tier 2	painters Oakleigh South	Upgrade, then index in a measured batch
Clayton South /service-areas/clayton-south/	South Eastern Suburbs	Growth / Tier 2	painters Clayton South	Upgrade, then index in a measured batch
Vermont /service-areas/vermont/	Eastern Suburbs	Growth / Tier 2	painters Vermont	Upgrade, then index in a measured batch
Vermont South /service-areas/vermont-south/	Eastern Suburbs	Growth / Tier 2	painters Vermont South	Upgrade, then index in a measured batch
Forest Hill /service-areas/forest-hill/	Eastern Suburbs	Growth / Tier 2	painters Forest Hill	Upgrade, then index in a measured batch
Blackburn /service-areas/blackburn/	Eastern Suburbs	Client target / Tier 1	painters Blackburn	Complete unique proof and index first
Blackburn North /service-areas/blackburn-north/	Eastern Suburbs	Growth / Tier 2	painters Blackburn North	Upgrade, then index in a measured batch
Blackburn South /service-areas/blackburn-south/	Eastern Suburbs	Growth / Tier 2	painters Blackburn South	Upgrade, then index in a measured batch
Nunawading /service-areas/nunawading/	Eastern Suburbs	Growth / Tier 2	painters Nunawading	Upgrade, then index in a measured batch
Mitcham /service-areas/mitcham/	Eastern Suburbs	Growth / Tier 2	painters Mitcham	Upgrade, then index in a measured batch
Ringwood /service-areas/ringwood/	Eastern Suburbs	Growth / Tier 2	painters Ringwood	Upgrade, then index in a measured batch
Ringwood East /service-areas/ringwood-east/	Eastern Suburbs	Hold / Tier 3	painters Ringwood East	Noindex until differentiated
Ringwood North /service-areas/ringwood-north/	Eastern Suburbs	Hold / Tier 3	painters Ringwood North	Noindex until differentiated
Heathmont /service-areas/heathmont/	Eastern Suburbs	Hold / Tier 3	painters Heathmont	Noindex until differentiated
Bayswater /service-areas/bayswater/	Eastern Suburbs	Hold / Tier 3	painters Bayswater	Noindex until differentiated
Boronia /service-areas/boronia/	Eastern Suburbs	Hold / Tier 3	painters Boronia	Noindex until differentiated
Wantirna /service-areas/wantirna/	Eastern Suburbs	Hold / Tier 3	painters Wantirna	Noindex until differentiated
Wantirna South /service-areas/wantirna-south/	Eastern Suburbs	Hold / Tier 3	painters Wantirna South	Noindex until differentiated

Suburb / canonical route	Region	Priority	Focus keyphrase	Required action
Knoxfield /service-areas/knoxfield/	Eastern Suburbs	Hold / Tier 3	painters Knoxfield	Noindex until differentiated
Ferntree Gully /service-areas/ferntree-gully/	Eastern Suburbs	Hold / Tier 3	painters Ferntree Gully	Noindex until differentiated
Scoresby /service-areas/scoresby/	Outer Eastern Suburbs	Hold / Tier 3	painters Scoresby	Noindex until differentiated
Rowville /service-areas/rowville/	Outer Eastern Suburbs	Growth / Tier 2	painters Rowville	Upgrade, then index in a measured batch
Lysterfield /service-areas/lysterfield/	Outer Eastern Suburbs	Hold / Tier 3	painters Lysterfield	Noindex until differentiated
The Basin /service-areas/the-basin/	Outer Eastern Suburbs	Hold / Tier 3	painters The Basin	Noindex until differentiated
Croydon /service-areas/croydon/	Outer Eastern Suburbs	Hold / Tier 3	painters Croydon	Noindex until differentiated
Croydon Hills /service-areas/croydon-hills/	Outer Eastern Suburbs	Hold / Tier 3	painters Croydon Hills	Noindex until differentiated
Kilsyth /service-areas/kilsyth/	Outer Eastern Suburbs	Hold / Tier 3	painters Kilsyth	Noindex until differentiated
Montrose /service-areas/montrose/	Outer Eastern Suburbs	Hold / Tier 3	painters Montrose	Noindex until differentiated
Lilydale /service-areas/lilydale/	Outer Eastern Suburbs	Hold / Tier 3	painters Lilydale	Noindex until differentiated
Mooroolbark /service-areas/mooroolbark/	Outer Eastern Suburbs	Hold / Tier 3	painters Mooroolbark	Noindex until differentiated
Chirnside Park /service-areas/chirnside-park/	Outer Eastern Suburbs	Hold / Tier 3	painters Chirnside Park	Noindex until differentiated

Every sitemap URL is accounted for

A fresh audit on 11 August 2026 found **162 URLs** across the live Yoast sitemap index. The intended `/blog/` hub is also included in this plan even though it is not currently listed in the live XML sitemap.

Live sitemap	URLs	Plan coverage
page-sitemap.xml	105	9 canonical core pages, 67 suburb pages, 19 duplicate guide pages and 10 legacy/duplicate routes.
spp_service-sitemap.xml	9	Every service has exact Yoast metadata and links.
spp_project-sitemap.xml	10	Every project record has an individual index/upgrade/consolidation decision below.
spp_article-sitemap.xml	19	Every article has an individual keyphrase, cornerstone and quality action.
spp_testimonial-sitemap.xml	7	Every query-style testimonial URL is listed for noindex/removal from XML while the testimonial stays visible where embedded.
spp_faq-sitemap.xml	10	Every query-style FAQ URL is listed for noindex/removal while its approved answer stays on the FAQ page.
category-sitemap.xml	1	Uncategorised archive decision included.
author-sitemap.xml	1	Single-author archive decision included.
Total live XML inventory	162	All 162 URLs receive an explicit action in this document.

Meaning of “every page” in this document: every URL exposed by the live Yoast sitemap index is named directly or is present in the 67-suburb, 9-service or 19-article registers. No sitemap content type is left under a vague site-wide rule.

Every alternate Page URL: exact disposition

Current live sitemap URL	Required target/action	Yoast handling
/roof-painting-melbourne/	301 → /services/roof-painting-melbourne/	Remove old Page from XML; destination self-canonical and indexable.
/painting-services-melbourne/	301 → /services/	Remove old Page from XML; use only /services/ in navigation and cards.
/professional-painters-in-melbourne-eastern-suburbs/	301 → /service-areas/	Remove old Page from XML; the destination must carry generic eastern-suburbs directory content.
/painting-guides/	301 → /blog/	Remove old hub Page from XML after /blog/ is a valid indexable CollectionPage.
/commercial-painting-melbourne/	301 → /services/commercial-painting-melbourne/	Remove duplicate Page from XML.
/residential-painting-melbourne-house-painters-melbourne/	301 → /services/residential-painting-melbourne/	Remove duplicate Page from XML.
/service-areas/painters-camberwell-house-painters-camberwell/	301 → /service-areas/camberwell/	Remove long-form duplicate from XML; preserve the approved Camberwell content on the canonical page.
/service-areas/painters-hawthorn-east-house-painters-hawthorn-east/	301 → /service-areas/hawthorn-east/	Remove long-form duplicate from XML; preserve approved content on the canonical page.
/property-improvement-services-melbourne/	301 → /additional-services/	Remove duplicate Page from XML; use the homepage flip card and internal links to the canonical route.
/painting-guides-melbourne/	301 → /blog/	Remove old hub Page from XML after /blog/ is indexable.
/painting-guides/how-often-repaint-house-melbourne/	301 → /blog/how-often-repaint-house-melbourne/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/interior-vs-exterior-painting/	301 → /blog/interior-vs-exterior-painting/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/professional-painting-services-melbourne/	301 → /blog/professional-painting-services-melbourne/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/experienced-painting-contractors-melbourne/	301 → /blog/experienced-painting-contractors-melbourne/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/prepare-house-before-professional-painters-melbourne/	301 → /blog/prepare-house-before-professional-painters-melbourne/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/interior-house-painting-melbourne-complete-guide/	301 → /blog/interior-house-painting-melbourne-complete-guide/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/exterior-house-painting-melbourne-weather-protection/	301 → /blog/exterior-house-painting-melbourne-weather-protection/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/commercial-painting-contractors-melbourne-businesses/	301 → /blog/commercial-painting-contractors-melbourne-businesses/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/roof-painting-melbourne-benefits-process-cost-guide/	301 → /blog/roof-painting-melbourne-benefits-process-cost-guide/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/how-professional-painters-repair-cracks-before-painting/	301 → /blog/how-professional-painters-repair-cracks-before-painting/	Remove duplicate Page from XML; retain the spp_article URL as canonical.

Current live sitemap URL	Required target/action	Yoast handling
/painting-guides/best-paint-colours-australian-homes-2026/	301 → /blog/best-paint-colours-australian-homes-2026/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/dulux-paint-systems-quality-paint-matters/	301 → /blog/dulux-paint-systems-quality-paint-matters/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/new-home-painting-melbourne-builders/	301 → /blog/new-home-painting-melbourne-builders/	Remove duplicate Page from XML; retain the spp_article URL as canonical.

/painting-guides/how-long-professional-paint-job-lasts-melbourne/	301 → /blog/how-long-professional-paint-job-lasts-melbourne/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/why-hiring-insured-painting-contractor-matters/	301 → /blog/why-hiring-insured-painting-contractor-matters/	Remove duplicate Page from XML; retain the spp_article URL as canonical.
/painting-guides/painter-melbourne-near-me-choose-local-company/	301 → /blog/painter-melbourne-near-me-choose-local-company/	Remove duplicate Page from XML; retain the spp_article URL as canonical.

Implementation order matters: create/test the destination first, replace all internal links, add a one-hop 301, remove the old WordPress Page from the sitemap, then request validation. Never leave both versions indexable with competing titles.

Every project-showcase URL

These URLs can become valuable case studies, but only if each page contains more than a reusable gallery shell. The default safe state is **noindex, follow** until the stated evidence exists. Once upgraded, use the recommended Yoast direction below and add the page to the sitemap.

Current URL	Focus keyphrase / SEO title after upgrade	Required proof and action
/projects/residential-painting-showcase/	residential painting projects Melbourne Residential Painting Projects Melbourne Superior Plus	Add property type, verified suburb, scope, preparation, products where approved, outcome and original gallery; link to Residential.
/projects/commercial-painting-showcase/	commercial painting projects Melbourne Commercial Painting Projects Melbourne Superior Plus	Add site type, scheduling constraints, scope, safety/access approach and original images; link to Commercial.
/projects/interior-painting-showcase/	interior painting projects Melbourne Interior Painting Projects Melbourne Superior Plus	Add rooms/surfaces, preparation, colour/finish where approved, outcome and original before/after media; link to Interior.
/projects/exterior-painting-showcase/	exterior painting projects Melbourne Exterior Painting Projects Melbourne Superior Plus	Make this the exterior project hub or one specific case study with verified property context; link to Exterior.
/projects/exterior-painting-showcase-2/	second exterior painting project Melbourne Exterior Painting Case Study Melbourne Superior Plus	If it is a distinct project, rename slug/title around verified suburb/property. If substantially duplicate, 301 to the primary exterior showcase.
/projects/fence-painting-showcase/	fence painting projects Melbourne Fence Painting Projects Melbourne Superior Plus	Add fence material/condition, preparation, finish and real result; link to Fence Painting.
/projects/outdoor-painting-showcase/	outdoor painting projects Melbourne Outdoor Painting Projects Melbourne Superior Plus	Clarify whether this is deck, pergola or another outdoor surface; rename around the verified work and link to Deck/Fence/Exterior.
/projects/roof-painting-showcase/	roof painting projects Melbourne Roof Painting Projects Melbourne Superior Plus	Add roof type/condition, cleaning/preparation and compatible coating details where approved; link to Roof Painting.
/projects/wallpaper-painting-showcase/	wallpaper removal projects Melbourne Wallpaper Removal Projects Melbourne Superior Plus	Correct ambiguous “wallpaper painting” wording if removal/preparation is shown; document stripping, adhesive removal and wall finish.
/projects/plaster-painting-showcase/	plaster repair projects Melbourne Plaster Repair Projects Melbourne Superior Plus	Clarify repair type, preparation and painted outcome; link to Plaster Repairs and Interior Painting.

Every testimonial and FAQ URL

These query-string URLs represent individual WordPress records used inside richer pages. They should not compete with the Homepage or FAQ page as thin standalone search results.

Testimonial records — preserve the review, noindex the record

Current live URL	Exact action
/?spp_testimonial=professional-reliable	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=excellent-quality	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=great-communication	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=value-for-money	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=sern-boey	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=josh-vatansever-ly	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.
/?spp_testimonial=omid-ashur	Noindex, follow; exclude from XML; retain the approved review in the visible reviews/testimonials section. Do not add self-serving LocalBusiness review-rating markup.

FAQ records — preserve the answer, noindex the record

Current live URL	Exact action
/?spp_faq=do-you-provide-free-quotes	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=what-areas-do-you-service	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=are-you-fully-insured	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=what-painting-services-do-you-offer	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=how-long-will-my-project-take	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=do-i-need-to-move-my-furniture	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=can-you-repair-walls-before-painting	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=what-type-of-paint-do-you-use	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=do-you-clean-up-after-the-project	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.
/?spp_faq=how-do-i-book-my-project	Noindex, follow; exclude from XML; retain the approved question and answer on /faqs/ and link that answer to a relevant service when helpful.

Developer setting: if these CPTs exist only as embedded content, set them to non-public/non-queryable for front-end singular records while retaining admin editing and REST access required by the site. In Yoast, set “Show in search results” to No and verify both CPT sitemaps disappear.

Every remaining live sitemap URL

Current URL	Decision	Reason / replacement
/category/uncategorized/	Noindex and remove from sitemap. Reassign any articles to meaningful categories before deleting the empty term where safe.	A generic “Uncategorized” archive has no client-facing search purpose.
/author/sppaintingremodeling-painting/	Noindex and remove from sitemap for now.	It is a single-author archive that duplicates article listings. If later replaced by a genuine expert profile with biography and credentials, reassess indexability.
/blog/	Create/confirm as the canonical Article CollectionPage and include in the sitemap.	This is the recommended destination for the two old painting-guide hub URLs and should list the 19 canonical /blog/... articles.

System pages not expected in the XML sitemap

WordPress admin/login, internal REST endpoints, search-result URLs, preview URLs, feeds, tracking parameters and form-success states should not be added as ordinary indexable landing pages. Verify their canonical/robots behaviour separately; retain only the public content URLs defined in this plan.

Approved 19-guide cluster

Use `/blog/{slug}/` as the recommended canonical family. Each article should answer its question fully, name an author/reviewer, show published and genuinely updated dates, use original project imagery where possible, and link to one principal service cornerstone.

Guide / canonical route	Focus keyphrase	Primary cornerstone	Yoast/quality action
How Often Should You Repaint Your House in Melbourne? <code>/blog/how-often-repaint-house-melbourne/</code>	how often to repaint a house	Residential Painting	Mark cornerstone; retain approved complete article; add maintenance checklist and service links.
Interior Painting vs Exterior Painting: What Is the Difference? <code>/blog/interior-vs-exterior-painting/</code>	interior vs exterior painting	Interior + Exterior	Mark cornerstone; comparison table, coating/preparation distinctions and links to both services.
Professional Painting Services Melbourne <code>/blog/professional-painting-services-melbourne/</code>	professional painting services Melbourne	Services hub	Avoid competing with Services hub: educational "what is included" intent and strong link to hub.
Experienced Painting Contractors Melbourne <code>/blog/experienced-painting-contractors-melbourne/</code>	painting contractors Melbourne	About / Services	Hiring checklist; verify every insurance/experience claim; link to About and quote process.
How to Prepare Your House Before Professional Painters Arrive <code>/blog/prepare-house-before-professional-painters-melbourne/</code>	prepare house for painters	Our Process	Practical checklist, accessibility notes and links to Process/Interior.
Interior House Painting Melbourne: Complete Guide <code>/blog/interior-house-painting-melbourne-complete-guide/</code>	interior house painting guide	Interior Painting	Long-tail guide; do not reuse the service page's sales copy.
Exterior House Painting Melbourne: Weather Protection <code>/blog/exterior-house-painting-melbourne-weather-protection/</code>	exterior house painting guide	Exterior Painting	Melbourne weather/surface guidance; link to roof, fence and deck where useful.
Commercial Painting Contractors Melbourne for Businesses <code>/blog/commercial-painting-contractors-melbourne-businesses/</code>	commercial painting contractors Melbourne	Commercial Painting	Scheduling, safety, access and disruption-management focus.
Roof Painting Melbourne: Benefits, Process and Cost Guide <code>/blog/roof-painting-melbourne-benefits-process-cost-guide/</code>	roof painting Melbourne guide	Roof Painting	Explain quote factors without invented prices; safety and coating compatibility.
How Professional Painters Repair Cracks Before Painting <code>/blog/how-professional-painters-repair-cracks-before-painting/</code>	repair cracks before painting	Plaster Repairs	Differentiate crack types; state when another trade/assessment may be required.
Best Paint Colours for Australian Homes in 2026 <code>/blog/best-paint-colours-australian-homes-2026/</code>	paint colours Australian homes 2026	Interior Painting	Time-sensitive: review yearly, cite current manufacturer palettes, add testing advice.

Guide / canonical route	Focus keyphrase	Primary cornerstone	Yoast/quality action
Why Quality Paint Systems Matter for Your Home /blog/dulux-paint-systems-quality-paint-matters/	quality paint systems	Interior + Exterior	Avoid implying endorsement/partnership; explain primer/topcoat compatibility and preparation.
New Home Painting Melbourne: Why Builders Choose Professionals /blog/new-home-painting-melbourne-builders/	new home painting Melbourne	Residential Painting	Builder coordination, sequencing, handover and touch-up intent.
Before and After: Painting Melbourne Homes /blog/before-after-professional-painting-melbourne-homes/	before and after house painting	Gallery	Use only real paired project images, scope and outcome; link to performed services.
Fence Painting Melbourne: Outdoor Protection /blog/fence-painting-melbourne-outdoor-protection/	fence painting Melbourne guide	Fence Painting	Preparation, application choice and coating suitability; avoid duplicating service sales copy.
Strata and Body Corporate Painting Melbourne Guide /blog/strata-body-corporate-painting-melbourne-guide/	strata painting Melbourne	Commercial / Additional	Stakeholders, scope, access and maintenance; create service page later only with capability proof.
How Long Does a Professional Paint Job Last in Melbourne? /blog/how-long-professional-paint-job-lasts-melbourne/	how long does paint last	Residential Painting	Explain variables and warning signs; avoid guarantees not supported by terms.
Why Hiring an Insured Painting Contractor Matters /blog/why-hiring-insured-painting-contractor-matters/	insured painting contractor	About	Explain verification questions; confirm the site's own insurance claim remains current.
Painter Melbourne Near Me: Choosing a Local Company /blog/painter-melbourne-near-me-choose-local-company/	painter Melbourne near me	Services / Contact	Comparison checklist, quote questions and real trust signals; no fake "near me" repetition.

Publishing rhythm

Start with the two fully developed client articles, then publish the remaining guides only after a human checks accuracy and usefulness. A practical cadence is two high-quality guides per month, with older cornerstone pages refreshed when a new supporting guide is added.

A deliberate site-wide link system

From	Must link to	Example natural anchors
Homepage	Services, all service cards, Service Areas, About/process proof, Gallery and Contact.	residential painting in Melbourne; areas we service; view Melbourne painting projects
Services hub	All 9 services + Additional Services + related guide hub.	roof painting; wallpaper removal; plaster repairs before painting
Each service	Services hub, 2–4 related services, 3–6 priority suburbs, 1–3 relevant guides, Gallery and Contact.	interior painters in Glen Waverley; see our painting process; request a written quote
Service Areas hub	Every indexable suburb grouped by region, plus core services and Contact.	painters in Chadstone; commercial painters in Dandenong
Each suburb	Hub, relevant services, neighbours, one guide, Contact.	exterior painting services; painters in nearby Oakleigh
Each guide	One main service page, one related guide, relevant Gallery/project evidence and Contact where appropriate.	professional exterior painting; compare interior and exterior painting
Gallery/case study	Performed service, actual suburb when relevant, Contact.	roof painting service; request a quote for a similar project

Anchor rule: buttons may visually say “Read more,” but the accessible link name or surrounding card should identify the destination. In body copy, prefer descriptive anchors over repeated exact-match keywords.

Cornerstones to mark in Yoast

Homepage Services hub 9 core service pages Service Areas hub How often to repaint Interior vs exterior

Do not mark every page cornerstone. The feature is useful only when it identifies the pages that should receive the strongest internal-link support.

Signals beyond Yoast

Google Business Profile

- Exact business name, phone, website and service area.
- Correct primary and secondary categories.
- Original project photos added regularly.
- Services and descriptions aligned with the live site.
- Respond to reviews without templated keyword stuffing.

Business consistency

- Use one phone/name format on site, profile and trusted directories.
- Correct outdated citations; do not create mass low-quality listings.
- Keep social profiles and business hours current.
- Only publish a street address if it is genuine and eligible.

Reputation

- Ask real customers for honest Google reviews.
- Never offer incentives in exchange for a positive rating.
- Display approved testimonials accurately.
- Turn substantial projects into evidence-rich case studies.

Earned links

- Suppliers, builders, property partners and local organisations.
- Useful project or maintenance resources worth citing.
- No purchased link packages, private blog networks or automated guest-post spam.
- Track referring domains and remove only demonstrably harmful tactics.

Trust details each important page should expose

Who performs/reviews the work; service scope; preparation method; suitable property types; real project imagery; clear quote process; contact details; applicable insurance statement; and a path to About, Gallery, Process and Contact.

Search visibility must still look good

Area	Implementation standard
File names	Use descriptive names such as exterior-house-painting-camberwell.webp; do not rename unrelated stock images to claim a location.
Alt text	Describe what is visibly shown and, when true, the service/location. Decorative shapes should use empty alt text.
Delivery	Use real <code>/picture</code> , modern formats, intrinsic width/height and responsive <code>srcset</code> . Do not lazy-load the main hero/LCP image.
Context	Place images beside relevant headings/captions. Include project scope and suburb only when verified.
Mobile	At 320–430 px, hero copy must remain readable, badges/floating buttons must not cover text, cards must not require hover, and long sections must wrap without horizontal scrolling.
Performance	Target LCP ≤ 2.5 s, INP < 200 ms and CLS < 0.1 at the 75th percentile; measure field data, not screenshots alone.

Page QA widths

320 × 568 360 × 800 390 × 844 430 × 932 768 × 1024 1366 × 768 1920 × 1080

Test short and deliberately long titles, two-paragraph descriptions, 15–30 list items, missing optional images, portrait/landscape media and several added sections. A layout is not verified just because the default content fits.

How to know whether the plan works

Metric	Where	Interpretation
Qualified quote submissions, phone clicks and email clicks	GA4 events + enquiry logs	Primary business outcome. Test delivery monthly; never assume a form submission email arrived.
Non-brand clicks/impressions by page and query	Google Search Console	Shows whether service and suburb visibility grows beyond searches for the business name.
Indexed canonical pages	Search Console Page indexing + URL Inspection	Should converge on the selected URL set; duplicates and thin records should decline.
Local calls, directions and website visits	Google Business Profile performance	Measures local discovery; compare month-on-month and year-on-year.
Core Web Vitals	Search Console + PageSpeed Insights field data	Prioritise page templates affecting many URLs.
Rank coverage	Search Console or a compliant rank tracker	Track a representative grid/market set; rankings vary by searcher location.

Reporting segments

Brand vs non-brand; service pages; Tier 1 suburbs; Tier 2 suburbs; articles; desktop vs mobile; conversions by landing page; new vs returning users. Annotate every theme/plugin release, redirect batch and major content update.

Decision window: technical errors can be checked immediately, but organic trend decisions need enough impressions and crawl time. Review monthly; make strategic decisions quarterly unless there is a clear defect.

30 / 60 / 90 / 180-day implementation

Window	Work	Exit criteria
Days 0–30 Repair	Backups/staging; analytics baseline; duplicate inventory; redirect map; metadata/schema ownership; Service Areas directory fix; sitemap pruning; form/email test; mobile blockers; submit sitemap.	One canonical per intent, clean sitemap, no critical schema errors, all core pages status 200, enquiries logged and delivered.
Days 31–60 Core pages	Implement the exact core/service Yoast map; internal links; image alt/file improvements; About/Process/Gallery proof; Contact conversion QA; mark true cornerstones.	Every core/service page has distinct metadata, correct schema, useful links, mobile QA and preserved approved wording.
Days 61–90 Local Tier 1	Upgrade/index primary suburbs; fix local images; connect service ↔ suburb ↔ project; strengthen Google Business Profile; begin citations/review workflow.	Each indexed Tier 1 page passes the evidence checklist and is not merely templated.
Days 91–180 Authority	Publish two quality guides/month; build case studies; promote earned local links; release Tier 2 areas selectively; refresh pages using Search Console query data.	Growing non-brand impressions, stronger internal-link graph, qualified leads attributable to organic/local channels.

Change-control rule

1. Take a backup and export current Yoast metadata.
2. Change one URL family or page batch at a time.
3. Test on staging, then production.
4. Purge cache and verify the public result.
5. Record before/after and keep a rollback route.

Per-page acceptance test

Content

- ☐ Client-approved wording is preserved.
- ☐ One visible H1 and logical H2/H3 structure.
- ☐ No invented claims or keyword stuffing.
- ☐ Lists remain readable on mobile.
- ☐ CTA matches the service and leads to Contact.

Yoast

- ☐ Distinct focus keyphrase.
- ☐ Accurate SEO title and meta description.
- ☐ Correct canonical and robots setting.
- ☐ Correct page/article schema type.
- ☐ Social share image/title checked.

Technical

- ☐ Status 200; HTTPS; self-canonical.
- ☐ Only one indexable URL for the content.
- ☐ Included in correct sitemap if indexable.
- ☐ No duplicate title/meta/canonical/schema.
- ☐ Structured data validates.

User experience

- ☐ Desktop and mobile layout tested.
- ☐ Images load; useful alt text; no layout shift.
- ☐ Menu, cards, accordions and links work by touch/keyboard.
- ☐ Floating controls do not obscure copy.
- ☐ Form sends and stores a recoverable enquiry.

Indexing decision

If the page is...	Then...
Unique, useful and intended to appear in search	Index, self-canonicalise, include in sitemap and link internally.
A duplicate of a chosen page	301 redirect to the exact equivalent and remove from sitemap/internal links.
Useful for visitors but not ready for search	Noindex, follow; keep accessible; improve before indexing.
Deleted with a close replacement	301 to that replacement.
Deleted with no replacement	Return genuine 404/410; do not redirect automatically to the homepage.
